

Set 4 Solar Union Jack Stake Lights

L504 v001: 04/11/22

Please read and retain these instructions for future reference

GAINSBOROUGH
Garden & Wildlife

ALWAYS POSITION IN DIRECT SUNLIGHT

Dimensions

(H) 53.5 x (W) 12cm

Battery (included): AA" 1.2v 200Mah, Ni-MH, Rechargeable

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Before using first time

1. There is an "on/off" switch at the back of the solar panel case. Push the switch to "on" position. Then position the light in a sunny location. Charge the solar product by placing it under direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to test the lights simply cover the solar panel with your hand and the light should turn on automatically.

Find an ideal Place for the Solar Light.

Place the solar panel in an area where it will receive direct sunlight for at least 8 hours per day. The number of hours the light will illuminate is directly proportional to the hours of sunlight it receives. If the panel is placed in a shaded area, it will not be able to fully charge and its illumination time will be limited. Do not place the panel near other outdoor lighting like porch or streetlights. These may fool the sensor and keep the light from coming on, or cause it to turn off automatically

Care and Maintenance Recommendations

1. Clean solar panel with a soft sponge every couple of weeks.
2. Make sure all connectors are still tight and no water getting in.

Battery replacement:

1. Make sure the switch is set to "ON" position.
2. Keep the solar panel clean.
3. If solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1x AA 1.2v 200Mah, Ni-MH, Rechargeable– Same equivalent type as recommended must be used).
